RISK FACTORS

Investors should know that IDLC Asset Management Shariah Fund is not a guaranteed or assured return scheme and the past performance of the Sponsor and their affiliates / AMC does not guarantee future performance of the Scheme. The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns. Investing in the IDLC AML Shariah Fund involves some general risks and some scheme specific risks that investors should carefully consider before investing in the Fund.

General Risk Factors:

- I. Due to the fluctuation of the price / value / income of the securities in which Scheme invests, the value of investment in the Scheme may go up or down depending on the various factors and forces affecting the capital markets.
- II. Government policy and tax laws may change, affecting the return on investments of the fund, which may eventually affect the NAV and return of the Units.
- III. Large number of redemption requests, may lead to an asset-liability mismatch and therefore may require the investment manager to make a quick sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.
- IV. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme remain idle and no return is earned thereon. The inability of the Scheme to make intended securities purchases and sales, due to settlement problems, could cause the Scheme to miss certain investment opportunities.

Risk factors associated with investing in equities and equity related instruments:

- I. As the major portion of the fund will be allotted to growth assets, the risk is also high in this case. Generally, the future growth prospect of a company depends on multiple factors, some of which are beyond the level of management capacity. So, if one or some of these factors go unfavorable, it is possible that the company may not be able to deliver the expected growth.
- II. Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis.
- III. Securities, which are not listed on the stock exchanges, are illiquid in nature and entails higher liquidity risk, in comparison to securities that are listed on the exchanges.
- IV. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges.
- V. Despite careful investment selection of companies in the Fund, if the companies fail to provide the expected dividend or fail to disburse the dividends declared in a timely manner, this will impact the income of the Fund and the overall return of the Fund.

THE MUTUAL FUND IS NOT GUARANTEEING OR ASSURING ANY RETURNS

1.8 Systematic Investment Plan (SIP)

A Systematic Investment Plan or SIP is a smart and hassle free mode for investing money in mutual funds. SIP allows an investor to invest a certain pre-determined amount at a regular interval (monthly, quarterly, yearly etc.). A SIP is a planned approach towards investments and helps to inculcate the habit of saving and building wealth for the future.

Buy and Surrender in SIP Process:

An investor can invest through SIP either by auto debit system provided against investor’s Bank Account or by providing monthly predetermined cheques via selling agents at a regular interval (monthly / bi-monthly / quarterly). Investor must have a BO Account; he / she will get the SIP units in his / her BO Account and may get a discount from ongoing Weekly “Investor’s Buy Price” of the mutual fund.

It is advisable to continue SIP investments with a long-term perspective, there is no compulsion. Investors can discontinue the plan at any time. If an investor wants to terminate the SIP before 2 (two) years, 1% discount from the “Investor’s sale / surrender price” may be applicable on total accumulated invested amount on the date of cancellation of the scheme. After maturity of SIP, the investor can easily surrender his / her total units through the AMC or the Selling Agents.

Benefits may be offered for Investors such as:

SIP encourages a disciplined investment; while invested through SIP, investor commits himself / herself to save regularly. Different benefits may be offered as follows:

- **Flexibility:** Investor can start SIP with a very small amount i.e. BDT 3,000 / BDT 4,000 / BDT 5,000 or multiple of additional BDT 1,000. One can also increase / decrease the amount being to be invested in regular fashion.
- **Flexible SIP Tenor:** The SIP will be offered for at least 2 years or any other higher period set by the AMC. However, investor can set SIP scheme for 3 years / 5 years or as decided by the Asset Manager. After this period, the individual scheme will be matured and may surrender or continue after maturity. If surrendered, no fees / charges may be charged on surrender and may also offer highest premium over the declared surrendered price at that time.
- **No Minimum lot size:** There will be no minimum lot size under the SIP as like normal investors. Based on “Investor’s Buy Price” per unit available for SIP investors, units will be credited to investor’s BO account. However, any fraction amount remaining will be converted when it sums up to one unit. The fractional amount will be kept as liability of the fund in a separate account head.
- **Buy at discount and Surrender at premium:** If any entry load is applicable for non-SIP investors, then SIP investors may buy units at a discount from Weekly “Investor’s Buy Price” offered to the non-SIP investors. In addition to that, if any exit load is applicable for non-SIP investors, then SIP investors may surrender at a premium of “investor’s sale price” offered to the non-SIP investors at maturity as mentioned in the SIP brochure.
- **CIP option for the SIP investors:** SIP investors can choose either option of cash dividend or Cumulative Investment Plan (CIP). If a SIP investor chooses CIP (i.e. Dividend reinvestment process) instead of cash dividend, they may also enjoy CIP units at a discount of prevailing “Investor’s Buy Price” used for CIP conversion. After CIP conversion, they will get dividend on total number of units in the next year.

Detailed of SIP Scheme, Scheme information will be provided in the Scheme Brochure in future

CHAPTER 2: BACKGROUND

2.1 Preamble to the formation of IDLC AML Shariah Fund

Mutual Fund is an investment tool that collects pool of fund from individual and institutional investors with a view to investing the fund in securities like stocks, bonds, money market instruments and other securities. Mutual funds are the most cost effective way to diversify the investment portfolio across different asset categories. Moreover, mutual funds offer professional money management expertise at a reasonable cost. Especially in a developing country like Bangladesh where mass people are ignorant about investment management strategies, importance of such professional management services are beyond question.

The origin of mutual funds are often cited to be traced in Europe back in 19th century. By the time mutual fund industry grew enormously with innovation of different investment strategies catering the need of different types of investors.

Mutual fund was first introduced by Investment Corporation of Bangladesh (ICB), a public sector financial institution, in 1980. Later on, private companies started to enter the industry in 2000. Currently, there are only 37 closed end mutual funds and 47 open end mutual funds in Bangladesh as of April 2019. Moreover, the mutual fund industry in Bangladesh also lacks the diversity of products to cater different investment preferences of people. In Bangladesh, where Muslims constitute around 90.0% of the population, the need for Shariah based investment tools is unbound. There are only 4 closed end mutual funds and 9 open end mutual funds offering Shariah based investment opportunity.

Recognizing the huge untapped market potential of mutual fund industry in Bangladesh and the need to offer a reliable solution for Shariah based investment to the people, IDLC Asset Management Limited (IDLC AML) has decided to launch its first Shariah based open-end mutual fund namely "IDLC AML Shariah Fund". It will be an open-end mutual fund that will aim to generate profit in a portfolio of Shariah compliant securities, vetted by the Shariah Advisory Board. The fund intends to deliver the profit among the investors in the form of dividend as well as capital appreciation, strictly adhering to the Shariah principles.

2.2 Necessity of Unit Fund in the Context of the Current State of Affairs of the Capital Market of Bangladesh

The capital market of Bangladesh is still in a nascent stage which portrays both opportunities and challenges. Though stock exchanges were formally established as early as 1954, activities remained very low until 1990s. Market experienced both bubble and burst during its journey of around six decades. Though over the years the capital market is transforming into a more structured and regulated form, it is still lagging behind in terms of number of stocks listed, asset classes available for investment etc. In emerging markets like Bangladesh where mass people lack the knowledge of proper investment decision, the scope of mutual fund industry, that offers professionally managed investment management service, is very bright. The mutual fund industry of Bangladesh is still very small compared to other countries.

The global Asset under Management (AUM) stood at USD 69.1 trillion in 2016 according to a report of BCG (Boston Consulting Group). Total AUM in Bangladesh is approximately BDT 141.1 bn as on April 2019, while it is approximately Rs. 23,795.8 bn in India as of March 2019. AUM to GDP ratio in Bangladesh is only 0.8%, while it is 13.7% in India and 87.7% in USA. So, there is ample opportunity of this industry to grow in Bangladesh.

Moreover, the global Islamic fund management industry which was USD 56.1 billion in 2016 is expected to be USD 403.0 billion by 2022 as per ICD-TR projection, reflecting the increasing preference of Shariah based investment. Bangladesh being a Muslim majority country is also expected to be a part of this growth.

2.3 Advantages of Investing in IDLC AML Shariah Fund

IDLC AML Shariah Fund will be managed in manner that will ensure utmost benefit for the investors from their investment. Generally mutual funds are designed in such a way that reduces the risk of investment compared to direct investment in other securities like shares, sukuk etc. In addition investors will enjoy the following advantages from investing in "IDLC AML Shariah Fund":

- I. IDLC Asset Management Limited through its proper corporate governance culture will ensure proper compliance with সিকিউরিটিজ ও এক্সচেঞ্জ কমিশন (মিউচুয়াল ফান্ড) বিধিমালা, ২০০১ under all circumstances.
- II. IDLC AML Shariah Fund will strictly adhere to the Shariah principles in making investment decisions and distributing the profit among its investors. The Shariah Advisory Board will closely overlook the investment activities of the Fund and ensure the compliance to the Shariah principles.

- III. The fund will maintain a diversified portfolio through adequate professional knowledge which will reduce individual investment risk that would have been otherwise difficult through direct investment.
- IV. Experienced professional management will help identify and secure potential investment opportunities.
- V. The fund will offer minimum 70% of annual realized profit as cash dividend on regular basis. However, investors will have the discretion of choosing between cashing out the dividend and reinvesting the dividend through purchasing new units.
- VI. Investors can hold larger number of securities through holding a single unit of the fund without having to incur high transaction cost like brokerage fee.
- VII. Mutual funds enjoy 10% reserved quota in Initial Public Offerings (IPOs) under the current rules provided by BSEC, which enables the investors to enjoy the benefits of participating in IPOs indirectly.
- VIII. Dividend income from this Fund will be tax free up to BDT 25,000.00 (Twenty Five Thousand Taka) as permitted by the Finance Act. As an open-end fund is not traded in the secondary market, its price will not be subjected to the interaction of demand and supply.
- IX. As sales and repurchase price will be calculated based on Net Asset Value (NAV) as prescribed in সিকিউরিটিজ ও এক্সচেঞ্জ কমিশন (মিউচুয়াল ফান্ড) বিধিমালা, ২০০১, the price of the fund will be more stable than that of other securities traded in secondary market.

2.4 Tax Advantages

Investment in this Fund by individual investors will enjoy tax exemption benefit under Section 44(2) of the Income tax Ordinance, 1984. Country's Finance Act and Government's tax policies will always determine the tax benefits from investment in mutual funds. However, investors in mutual funds are entitled to the following tax benefits under the current tax policies:

1 Tax advantage on Income:

Income from a mutual fund or a unit fund up to BDT 25,000.00 (Twenty Five Thousand Taka only) is exempted from tax as per clause 22A of 6th Schedule (Part A) under Income Tax Ordinance, 1984.

2 Investment Tax Credit:

According to the Section 44(2)(c) under Income Tax Ordinance, 1984, the amount of allowable investment is actual investment or 25% of total taxable income or BDT 1,50,00,000.00 (One crore & Fifty Lac Taka only), whichever is lower. According to the Section 44(2) (b) under Income Tax Ordinance, 1984, the tax rebate rate is from 15% to 10% as per following schedule:

Total Taxable Income	Rate of Tax Rebate
Up to BDT 15,00,000.00	15% of eligible amount
More than BDT 15,00,000.00	10% of eligible amount

Example:

An individual's annual taxable income is BDT 50,00,000.00 (Fifty Lac Taka only) and actual investment is BDT 20,00,000.00 (Twenty Lac Taka only). His eligible investment for tax rebate will be the **lowest amount of the following figures:**

- | | | |
|------|------------------------------|---|
| i. | Actual Investment: | BDT 20,00,000.00 |
| ii. | 25% of total taxable income: | BDT 12,50,000.00 (25% x BDT 50,00,000.00) |
| iii. | Maximum eligible investment: | BDT 1,50,00,000.00 |

Considering the above three figures, the eligible investment will be BDT 12,50,000.00 (Twelve Lac Fifty Thousand Taka only). As his annual taxable income is above BDT 15,00,000.00 (Fifteen Lac Taka only), so the total tax rebate for the individual will be BDT 1,25,000.00 (10% x BDT 12,50,000.00).

The investor can reduce his tax liability of BDT 1,25,000.00 (One Lac Twenty Five Thousand Taka only) by investing in the mutual fund.

THIS IS A SIMPLE ILLUSTRATION. THE AMOUNT CAN VARY AND WILL DEPEND ON INDIVIDUAL CIRCUMSTANCES. ALSO, PLEASE NOTE THAT THE TAX REBATES MAY CHANGE AS PER GOVERNMENT'S DECISION IN ANY YEAR. INVESTORS ARE ADVISED TO CONSULT WITH THE TAX ADVISOR, IF REQUIRED.

3.6 Shariah Screening Policies and Guidelines

Apart from following the regulatory guideline for investment, the Fund will strictly follow the Shariah based screening policies and guidelines as described below

3.6.1 Business Activities Based Screening

The basic business of the investee company should be in consistence with the Shariah Law. Although no universal consensus exists among contemporary Shariah scholars on the prohibition of companies, most Shariah Boards have advised against investment in companies involved in the activities of:

1. Advertising and Media (newspapers are allowed, sub-industries are analyzed individually)
2. Alcohol
3. Embryonic or stem cell research and cloning
4. Financials (Conventional Banks, Insurance and Leasing/Finance Companies)
5. Gambling
6. Pork
7. Pornography
8. Tobacco
9. Trading of gold and silver as cash on deferred basis

During the selection process, each company's audited annual report is reviewed to ensure that the company is not involved in any Shariah non-compliant activities. Those that are found to be non-compliant are screened out. The above industries are not considered Islamic and would not be appropriate for investment for observant Muslims.

3.6.2 Accounting-Based Screening

After removing companies with non-compliant business activities, the rest of the companies are examined for compliance in financial ratios, as certain ratios may violate compliance measurements. Three areas of focus are leverage, cash, and the share of revenues derived from non-compliant activities. All of these are subject to evaluation on an ongoing basis.

1. Leverage Compliance:
 - i. Debt to Total market capitalization (36 month average) ratio < 33.0%
2. Cash Compliance:
 - i. Accounts Receivables / Market value of Equity (36 month average) < 49 %;
 - ii. (Cash + Interest Bearing Securities) / Market value of Equity (36 month average) < 33%;
3. Revenue Share from Non-Compliant Activities. In certain cases, revenues from noncompliant activities are permissible, if they comply with the following threshold:
 - i. (Non-Permissible Income other than Interest Income) / Revenue < 5%

3.6.3 Other Shariah Compliant Instruments

The Fund may also invest in other Shariah Compliant instruments as and when they are available for investment, specifically;

1. In particular Term Certificates, Mudaraba Certificates, Musharika, Murabaha, Term Finance Certificates and all other asset backed securities;
2. In contracts, securities or instruments of companies, organizations and establishments issued on the principles of Bai' Mu'ajjal, Bai' Salam, Istisna'a, Mudaraba, Murabaha and Musharika;
3. In the form of Riba-free cash deposits with Islamic Banks or financial institutions with the object of maintaining sufficient liquidity to meet the day-to-day requirement and to take advantage of suitable investment opportunities as and when they arise;
4. In other instruments that may be allowed and confirmed as Shariah Compliant by the Fund's Shariah Advisory Board from time to time;

Non-listed Securities	<ul style="list-style-type: none"> ■ The Fund shall follow the method approved by the Commission for valuation of the non-listed investment, if any, and the Asset Management Company and the Trustee shall periodically review the non-listed investment, if any. The auditors shall comment on such investment in the annual report of the Scheme of the Fund. ■ The Asset Management Company and the Trustee will value the non-listed securities at least once in every three months. ■ Once non-listed securities are valued, the valued amount will be considered for purpose of valuing the Fund's assets in any interval of time until the securities are further revalued by the Asset Management Company.

Others	<ul style="list-style-type: none"> ■ For securitized debts, debentures, margin or fixed deposits, the accrued interest on such instruments on the date of valuation shall be taken into account in any calculation of Net Asset Value of such securities in the portfolio of the Fund. ■ In case of deferred expenses, accrued expenses for the period will be taken into account for determining total liabilities.
--------	--

Net Asset Value (NAV) calculation:

The Fund intends to determine its NAV per unit on the last business day of each week by dividing the value of the net asset of the Fund (the value of total assets less total liabilities as per Rule 60 of the সিকিউরিটিজ ও এক্সচেঞ্জ কমিশন (মিউচুয়াল ফান্ড) বিধিমালা, ২০০১, by the total number of outstanding units. The Fund will use the following formula to derive the NAV per unit:

$$\text{Total NAV} = V_A - L_T$$

$$\text{NAV per unit} = \text{Total NAV} / \text{No. of outstanding units}$$

V_A = Value of all securities in vault + Value of all securities placed in lien + Cash in hand and at bank + Value of all securities receivables + Receivables of proceeds of sale of investments + Dividend receivables net of tax + Interest receivables net of tax + Issue expenses amortized as on date + Printing, publication and stationery expenses amortized as on date

CHAPTER 4: INVESTMENT MANAGEMENT PROCESS

IDLC AML aims to offer a 100% percent Shariah complaint investment solution for investors through IDLC AML Shariah Fund. The Fund will generate profit for investors in the form of dividend as well as capital appreciation by strictly adhering to the Shariah principles. In order to fulfill the investment objective, the asset manager would adjust the portfolio on a continuous basis by identifying the allowable investment opportunities and risks through rigorous economic, market, sector and scrip level analysis. Shariah Investment Guideline will be strictly followed in each step, starting from asset selection process to distribution of return to the investors to ensure Shariah compliance throughout the process.

4.1 Asset Allocation:

As the objective of the Fund is to generate “Halal” return as per the law of Shariah, the investments will be strictly limited to Shariah compliant assets only. Investments will be broadly divided into following two categories: Shariah compliant growth assets and Shariah compliant income generating assets.

Shariah compliant growth assets: The assets that are expected to generate capital gains through price appreciation. The growth assets will be comprised of Shariah compliant equity securities predominantly.

Shariah compliant income generating assets: The assets that generate income on regular basis e.g. Sukuk, Islamic liquid assets and high dividend yielding Shariah compliant stocks.

The asset allocation of the portfolio of IDLC AML Shariah Fund will be as follows:

Type of Instruments	Normal Allocation (% of Net Assets)	Normal Deviation
Shariah compliant growth assets	60.0%	±20.0%
Shariah compliant income generating assets	40.0%	±20.0%

In response to changing economic and industry dynamics IDLC AML may adjust the asset allocation of the portfolio in order to achieve greater risk adjusted return within the investment scope allowed as per Shariah guideline and limitations set by the regulatory authority.

4.2 Type of Shariah Compliant Assets:

Following is a summary of different types of Shariah compliant assets:

- I. **Equity:** A stock or any other security representing an ownership interest is called equity. Equity investments available in Bangladesh are as follows:
 - **Listed Equities:** Listed equities are those companies whose shares are traded on stock exchanges. Listed equities are more liquid in nature. DSEX Shariah Index (DSES) serves as a Shariah Compliant broad market benchmark which includes all the listed stocks that pass through the rule based screens for Shariah compliance.
 - **Pre-IPOs and IPOs:** Mutual Funds can make investment in Pre-IPO companies which are approved by BSEC. The purpose of such investment is to capture the capital gain potential of a company which has enormous growth opportunity ahead. Mutual funds also has been allotted a fixed quota of 10% to invest in IPOs. Only the Pre-IPO and IPO investments that meet the eligibility criteria according to the Shariah Investment Guideline will be considered for investment.
- II. **Sukuk:** Sukuk is an Islamic financial certificate, which are commonly referred to as “Shariah Compliant Bond” that complies with Islamic religious law. Since traditional interest-bearing bonds are not permissible in Islam, Sukuk is an alternative way of Shariah compliant investment which offers profits instead of interest, generally involving a tangible asset in the investment. There is no Sukuk available for investment in Bangladesh as of now. However, Bangladesh Government is working to launch Sukuk. Draft rules in this regard has already been published.

- III. **Term Deposits in Islamic Financial Institutions:** Investment can be made in the form of Mudaraba or Musharaka deposit schemes in Shariah compliant financial institutions.

4.3 Asset Selection Process:

IDLC AML Shariah Fund is positioned to cater the investment need of the investors who aim to earn risk adjusted return according to the Shariah law. The Fund will invest mostly in Shariah compliant assets with long-term growth potential that will yield capital gain. The Fund will also invest in Shariah compliant income generating assets which provide regular income. Based on market condition, the Fund will alter the exposure between these asset classes. The first and foremost step in the asset selection process is ensuring the Shariah compliance of the potential investment. Later on, investment selection process would be driven by IDLC AML's investment philosophy, with each alternative passing intense scrutiny considering all identifiable internal and external factors affecting the return potential.

- **Shariah Screening Methodology:** Each investment opportunity will be thoroughly examined and scrutinized to ensure that it meets all the criteria of Shariah compliance. IDLC AML Shariah Fund will subscribe to DSEX Shariah Index (DSES) which will provide the list of Shariah compliant listed companies on monthly interval. DSES utilizes the Shariah screening methodology and processes employed by S&P Shariah Family of Indices with collaboration of Rating Intelligence Partners, a London/Kuwait based consulting company. The Shariah screening methodologies involve business based screening and accounting based screening which have been articulated in section 3.6 of this prospectus.

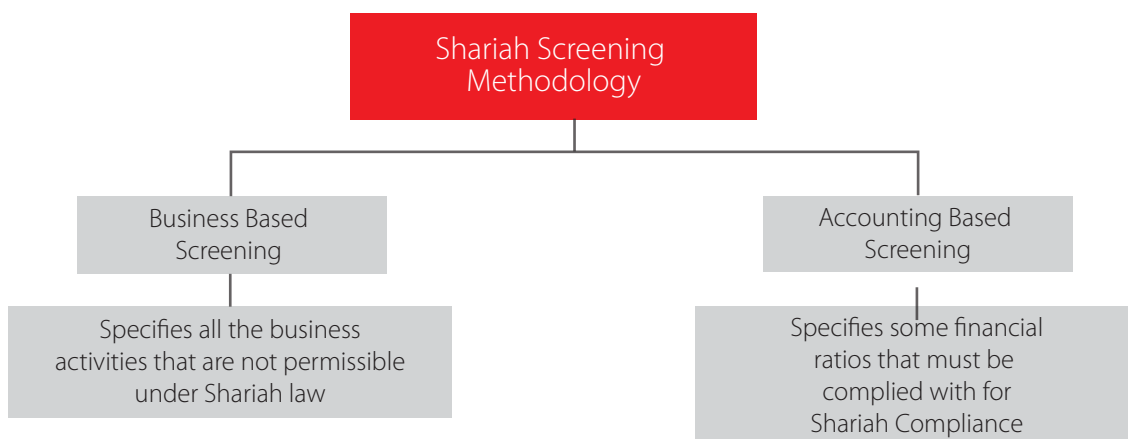

Figure 1: Shariah Screening Methodology

The Shariah Advisory Board will confirm that all the investments of IDLC AML Shariah Fund are made in accordance with the Shariah law. Accordingly, the board will issue a certificate in this regard annually, vetting the Shariah compliance of the Fund.

- **Investment Philosophy:** IDLC AML strongly believes that good corporate governance and adequate management capacity are the preconditions for any good investment. This is the investment philosophy that IDLC AML would adhere to before making any kind of investment decision.

IDLC AML will follow their internal investment philosophy while analyzing different asset classes for identifying investment opportunities after the Shariah based screening.

Corporate governance is defined as-

The system of rules, practices and processes by which a company is directed and controlled. It instills policies and rules for maintaining the cohesiveness of an organization. Good corporate governance ensures transparency, accountability and compliance within the organization.

Capacity of management refers to-

The ability of management to run a business successfully. IDLC AML believes that the management of the company should have the required strategic and technical abilities to help the company achieve its goals.

- **Investment Analysis of Equity:** While selecting an equity for investment, a thorough analysis will be conducted including the economic factors, industry specific factors, and business specific factors. The analysis can be a 'top-down' approach which will start from addressing the current economic conditions, identifying the industries with future growth potential and finally selecting the appropriate company within the industry for investment based on company specific factors.

The alternative approach can be 'bottom-up' which will start identifying a specific company with positive business specific attributes and then looking for favorable industry specific and economic factors for further investment decision support. Thorough analysis of the company fundamentals helps identify long-term investment prospect. IDLC AML will nurture the following investment selection process for equities:

Economic Analysis- Economic indicators like GDP growth, per capita income, per capita consumption etc. helps to understand the dynamics of an economy and growth potential of businesses.

Industry Analysis- Industry analysis helps to understand the market share of companies, the degree of concentration and competition within the industry and growth prospects of the industry.

Company Analysis- Business dynamics like product demand, revenue growth, margins, net profits, dividends, debt burden, asset quality, corporate governance, management capacity etc. all these factors will be considered for a detailed analysis of a company.

Accumulating all the information and using subjective judgment based on own knowledge, analysts will forecast future earnings of a company.

Finally the most suitable valuation method will be used to find out the intrinsic value of a company which will ultimately indicate the return potential from that investment within a specified time period.

IDLC AML Shariah Fund will also consider investing in Pre-IPO companies with a solid business model depicting an appealing growth story in future. Investing in Pre-IPOs also comes with some risk factors in terms of discovering the appropriate value and liquidity at the time of sale. However, such companies offer easier access to management and greater availability of detailed financial information compared to the listed companies. Equipped with an efficient research team and prudent investment committee, IDLCAML believes to rightly identify a potential business model and well balance the return and risk of the Funds' portfolio through such investment.

- **Investment Analysis of Sukuk and other Islamic term deposits:** While selecting from Sukuk and other Islamic term deposits, IDLC AML will consider the following factors

- i. **Credit Rating:** Credit rating indicates the ability of an organization to fulfill its financial commitments. Credit rating agencies assign ratings to companies and financial instruments depending on its capacity to meet its debt obligations. Credit rating will be a major factor to consider before investing in Sukuk.
- ii. **Liquidity:** Sukuk can be of different tenors. Generally, longer is the maturity term, the lower is the liquidity. When investing in such securities liquidity will be an important factor to consider.

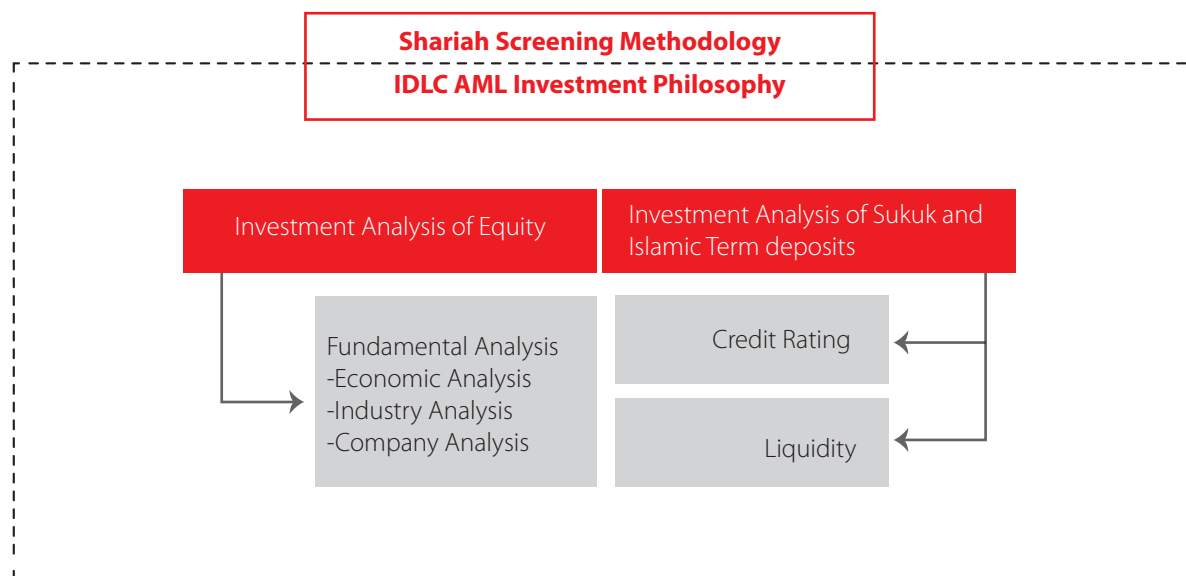

Figure 2: Asset Selection Process

4.4 Investment Scenario Analysis:

By nature the IDLC AML Shariah Fund will invest in Shariah compliant growth assets predominantly. As there is no Sukuk in Bangladesh, the Fund has to look for growth opportunities mostly in equities. Nonetheless, continuous monitoring of asset allocation is necessary as the Fund will take position in income generating assets, whenever necessary, to maintain a buffer when the market is in down trend.

The portfolio of growth assets and income generating assets would be managed as per the changing conditions of market scenario. Under normal scenario with stable index, the normal allocation between growth assets and income generating assets of IDLC AML Shariah Fund will be 60% and 40% respectively. However, the allocation may vary within $\pm 20\%$ band depending on the changing market conditions. Below is a simplified depiction of the changes in portfolio composition for illustration purpose. In reality the changes are much more dynamic and complex.

■ Volatile market scenario:

The portfolio composition of the fund will change relative to the changing conditions of the market. The market can be stable or there can be Bull Run or Bear Run in the market.

A bull market is a period of several months or years during which asset prices consistently rise. One common measure is that a bull market exists when at least 80% of all stock prices rise over an extended period. Another measure is that a bull market exists if market indices rise at least 15%.

During Bull Run, prices go up resulting in capital gain. Therefore, IDLC AML would reshuffle the portfolio composition giving greater weight to the assets with capital appreciation potential.

A bear market is a condition in which securities prices fall and widespread pessimism causes the stock market's downward spiral to be self-sustaining. Investors anticipate losses as pessimism and selling increases. Although figures vary, a downturn of 20% or more from a peak in multiple broad market indexes, over a two-month period is considered an entry into a bear market.

During Bear Run, securities face price correction and thus limiting the return opportunities through capital appreciation. In that case income generating securities would become more attractive investment choice and IDLC AML would reshuffle the portfolio accordingly.

4.5 Investment Execution Strategy:

To execute the investment decision at the right time is of utmost importance for achieving the desired return. After thorough investment analysis there are number of factors that IDLC AML would consider for the execution of investment decision.

- **Momentum:** Momentum is the rate of acceleration of price or volumes. While investing in listed security, momentum of that particular security is an important issue to consider for triggering buying and selling act.
- **Market Sensitivity:** Some securities are highly sensitive to the market movement reflecting a higher beta. Such cohesiveness needs to be identified for minimizing risks.

- **Margin of Safety:** Margin of safety is a principle of investing in which a security is purchased when the market price is significantly below its intrinsic value. This difference allows an investment to be made with minimal downside risk. For example, if an investor pays BDT 9.00 for a security that he believes to be worth BDT 10.00 his margin of safety is $[1-(9/10)]=10.00\%$. The more is the margin of safety, the less is the downside risk.
- **Liquidity:** When investing in a comparatively illiquid security, proper caution will be taken so that price of the security does not move abruptly to evaporate the return potential. For example, if the average volume of a security traded is 1,000 shares per day and the fund aims to buy or sell around 100,000 shares of that security it would be very difficult and price of that security will move sharply hampering the targeted return from that investment.
- **Change in Fundamentals:** Once the fund invested in a particular security, that security will be continuously monitored looking for change in the fundamentals on which the investment decision was made at the first instance and act accordingly.
- **Portfolio Rebalancing:** IDLC AML will be flexible and vigilant enough to look for other investment alternatives with higher return potential and reshuffling the portfolio accordingly, by selling existing

4.6 Procedure followed for Investment Decision:

- IDLC AML has engaged sector specific fund managers who will evaluate and recommend Shariah compliant investment opportunities in each sector.
- The investment decisions recommended by fund managers will subject to the final approval of Investment Committee (IC).
- IDLC AML has an Internal Investment Committee comprising of the Managing Director, Portfolio Managers and the Investment Analyst who meet at periodic intervals. The Investment Committee, at its meetings, reviews the performance of the schemes and general market outlook and formulates broad investment strategy.
- The Managing Director who chairs the Investment Committee Meetings guides the deliberations at Investment Committee. He/She, on an ongoing basis, reviews the portfolios of the schemes and gives directions to the Portfolio Manager, where considered necessary. It is the ultimate responsibility of the Portfolio Manager to ensure that the investments are made as per the Regulatory/internal guidelines, Scheme investment objectives and in the best interest of the unit holders of the respective schemes.
- The Managing Director makes a presentation to the Board of AMC at each of its meetings indicating the performance of the schemes. The performance of the schemes is reviewed by the Board with reference to the appropriate benchmarks as also the performance of the schemes of the competition.
- The Managing Director brings to the notice of the Board specific factors, if any, which are impacting the performance of any individual scheme. The Board on consideration of all relevant factors may, if necessary, give directions to AMC.
- Similarly, the performance of the schemes is submitted to the Trustees. The Managing Director explains to the Trustees the details on Schemes' performance.

4.7 Purification:

Shariah Investment Guideline not only sets the criteria of Shariah compliance for investment, it also ensures that the profit distributed to the investors is also completely pure in terms of Shariah Law. Given the complexity of the current financial market, Islamic Scholars acknowledge that there could be a chance of impure income, probably a very little portion, blended in the total income of a business. Accordingly, they articulated the way to cleanse the final profit to be distributed among the investors.

Purification is that cleansing process which removes any impure returns that is not permissible under Shariah Law and dispose of the non-permissible portion through donation to charitable organizations.

For purification, IDLC AML will use the purification ratio provided by DSEX Shariah Index (DSES). DSES provides company-wise Dividend Purification (DP) ratio on a monthly basis along with the investment universe. IDLC AML will use the DP ratio to purify the dividend received from companies by using the following formula:

Purification amount = DP ratio * Cash Dividend

CHAPTER 5: RISK FACTORS

5.1 Risk of Investment:

Investors should know that IDLC AML Shariah Fund is not a guaranteed or assured return scheme and the past performance of the Sponsor and their affiliates / AMC does not guarantee future performance of the Scheme. The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns. Investing in the IDLC AML Shariah Fund involves some general risks and some scheme specific risks that investors should carefully consider before investing in the Fund.

General Risk Factors:

- I. Due to the fluctuation of the price / value / income of the securities in which Scheme invests, the value of investment in the Scheme may go up or down depending on the various factors and forces affecting the capital markets.
- II. Government policy and tax laws may change, affecting the return on investments of the fund, which may eventually affect the NAV and return of the Units.
- III. Large number of redemption requests, may lead to an asset-liability mismatch and therefore may require the investment manager to make a quick sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.
- IV. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme remain idle and no return is earned thereon. The inability of the Scheme to make intended securities purchases and sales, due to settlement problems, could cause the Scheme to miss certain investment opportunities.

Risk factors associated with investing in equities and equity related instruments:

- I. As the major portion of the fund will be allotted to growth assets, the risk is also high in this case. Generally, the future growth prospect of a company depends on multiple factors, some of which are beyond the level of management capacity. So, if one or some of these factors go unfavorable, it is possible that the company may not be able to deliver the expected growth.
- II. Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis.
- III. Securities, which are not listed on the stock exchanges, are illiquid in nature and entails higher liquidity risk, in comparison to securities that are listed on the exchanges.
- IV. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges.
- V. Despite careful investment selection of companies in the Fund, if the companies fail to provide the expected dividend or fail to disburse the dividends declared in a timely manner, this will impact the income of the Fund and the overall return of the Fund.

5.2 Risk Scale:

IDLC AML introduces "Risk Scale" which is a graphical representation of the riskiness of the scheme. "Risk Scale" will indicate how much risk an investor needs to assume when investing in the product. There are five scales of risk on "Risk Scale", ranging from low to high. - The Fund will invest 60% of the Net Assets within $\pm 20\%$ band in Shariah compliant growth assets which will be equities predominantly with higher growth prospect in future. In cases, 80% of the Net Assets can be invested in Shariah compliant growth assets depending on the market situation.
- As per Shariah law, the Fund cannot invest in fixed income securities like FDR, conventional bonds etc. Accordingly, the investments of the Fund will be inherently more risky.

5.3 Risk Control Mechanism

As the objective of IDLC AML Shariah Fund is to generate greater risk adjusted return through investment in the most Shariah compliant way, the Fund will be managed strictly following the Shariah Law. Guaranteed return schemes are prohibited in Islam. As per Shariah, investors have to accept both profit and loss against their investment. Moreover, IDLC Shariah Fund will have more exposure in growth assets, it also has to assume higher risk associated with growth assets. To understand all those risks requires a great deal of analysis. It is very important for the fund manager to understand all the associated risks with the investment securities and establish proper control mechanism to minimize those risks. IDLC AML has engaged qualified investment professionals who have thorough knowledge about the downside risks of investment securities and would analyze all the publicly available data to discover the actual risk adjusted return of the securities. Apart from a well-qualified fund management team, there will be policies to check the credit risk and liquidity risk.

- IDLC AML's internal investment philosophy, which prioritizes good governance and adequate management capacity in case of investment decision, will immune the fund from investments in poorly governed investment securities.
